

CNC LATHE MACHINIST – 2nd SHIFT

Garfield Hts., Ohio

Tribotech Composites, Inc. is a world-class manufacturer of composite bearing materials and precision-machined parts. Lean, innovative, and innately flexible, while also ISO-9001 certified and positioned for growth, we thrive in a market that is often under-serviced and over-charged.

RESPONSIBILITIES:

- Edit, set up, and operate a CNC lathe to produce product according to print specifications by selecting the appropriate tools, materials and machining processes; programming capabilities a plus
- Troubleshoot programs including speeds, feeds and tooling
- Verify and document in process work orders.
- Ensure quality product by using necessary measuring equipment including calipers, micrometers, pi tape and optical comparator
- Routine preventative maintenance on equipment
- Meet production deadlines by following manufacturing schedule and procedures
- Follow all safety protocol
- Other duties, as assigned

WORK REQUIREMENTS:

- High School Diploma/GED
- Minimum 3-5 years CNC experience or completion of a CNC training program
- Proficiency in Math
- Attention to detail and a quick learner
- Experience with machining plastics is a plus
- Experience with writing/editing Fanuc programming preferred
- Team player
- Excellent attendance is a must!

PHYSICAL REQUIREMENTS:

Sit [25%], Stand [75%], Lift [over 50 lbs.], Walk, Bend, Stoop, Reach, Push & Pull, as well as Finger/Hand dexterity

WHY WORK AT TRIBOTECH COMPOSITES, INC.?

- Strong ethics and values
- Excellent co-workers and team oriented working environment
- Ability to learn and grow professionally
- Competitive compensation and benefits packages

Qualified candidates, please forward your resume to HR@TribotechComposites.com.
